INVESTIGATION FOR COMMERCE ATHLETE

High Schools Games Committee to Take Up Case This Week in Special Meeting.

TRACK MEETS ACCUMULATE

Indoor Basebal Schedule for Elementary Schools-Fifteen Teams in the Tournament.

Considerable interest attaches itself to the investigation which the high schools games committee will conduct this week into the Weinstein case, which was a sequence to the disqualification of the Curtis High School runner, Lennon, one of the point winners in the high school indoor champion-ships last month. It was admitted yeserday that a formal protest had been entered against the Commerce athlete by Stuyesant High School. The matter was laid before the committee on track athletics and the high schools games committee de-cided last week to hold a meeting on Tues-day next at the High School of Commerce and to thrash out the matter there. This place was selected for the meeting becaus t was thought it would be easier to probe into charges there where all the witnesses were readily available than to summon them

knows the inside of the situation that Weinthat time and did not pass into the senior class until four days later. Although the charges as they were entered have not been also a midget relay race for public schools, a one mile open senior relay race and a half [P. S. 171; P. S. 186 vs. P. S. 109; P. S. 3 vs. P. made public it was said that Weinstein also mile relay race, closed to private schools.

Is accused of having run under an assumed The High School of Commerce games

weinstein has a clean record as a student and passed off twenty hours of work in the last term without a condition. He is said to be indifferent about athletics. One of his acquaintances said that he trained only when prodded by the coaches and never had any interest in winning medals as such.

The decision of the high schools games. The decision of the high schools games which were held last Thursday, and the P.S. A. L. athletes who competed are beginning to wonder—whether they involved themselves in any trouble by so doing. The best runners in the league were entered and if they were suspended it would seriously tie up athletics for a while.

The recreation centre games will be held.

committee will not necessarily be final be-cause either party has the right to appeal to the games committee of the league

The principals of the New York private and public high schools decided at a recent meeting to have relay races count for points in all the games this winter. Hitherto they have not, and there was a great deal of dissatisfaction over the condition which permitted in many cases the most interesting events in the meets to cut no figure in the point score. An argument was advanced to have the relay races count ten, seven, five and three points instead of the customary, five, three, two and one, but this was lost. N. Archibald Shaw, principal of Hamilton Institute, was the man who agitated the change, and it will be put into effect in the Meritage. nto effect in the Hamilton Institute games next month.

Three high school meets come together

on March 16, and there consequently will be a surfeit of sport on that day. In the afternoon at the Twenty-second Regiment Armory will be held the Hamilton Institute meet, and this will be the only open set of games. De Witt Clinton and Morris High games. De Witt Clinton and Morris High School are scheduled to hold their closed meets in the evening, with but a limited the charges there where all the witnesses there readily available than to summon them to the league headquarters.

It was said yesterday by a man who allows the inside of the situation that Weinstein's record had been thoroughly probad. stein's record had been thoroughly probed and that there was absoluyely no reason to fear an investigation. Although there is no record of his birth filed with the Board of Health a letter was obtained from the lad's mother to the effect that he was six-special was a surface of the Columbia basketball five, broke the scholastic record last year. The junior events will be 70 and 220 yard sprints, and the midgets will have a 60 yard dash. An unusually large number of novice contests is to be included, among them the 60, 300 and 600 yard runs, high. teen years old on February 1. It was found also, the informant said, that this was legal evidence and would have to be accepted. As the high school games were held on January 27 Weinstein was a junior at League is listed a listed and there are any there are the said that the said of novice contests is to be included, among them the 60, 300 and 600 yard runs, high, jump and 8 pound shotput. For schools not members of the Public Schools Athletic on January 27 Weinstein was a junior at League is listed an extra rank that the said is to be included, among them the 60, 300 and 600 yard runs, high, jump and 8 pound shotput. For schools not members of the Public Schools Athletic on January 27 Weinstein was a junior at league is listed an extra rank that this was legal evidence and would have to be accepted.

AUTOMOBILES.

is accused of having run under an assumed have been postponed to Friday evening summer. What the evidence consists of at the Twenty-second Regiment Armory.

it would seriously tie up athletics for a while.

The recreation centre games will be held this year on May 4. Thirty-one centres and about éoo athletes will be entered. The high and broad jumps as usual will be decided at the final basketball games of the recreation centre tournament.

The elementary schools outdoor championships and novice games will be held at Curtis Field on June 1. The novice events will be decided in the morning and the championships in the afternoon.

The elementary school indoor baseball tournament, in which fifteen teams have entered, starts on Tuesday. Two divisions have been drawn up, the first for Brooklyn and Manhattan and Bronx teams. This arrangement was necessitated by the large Manhattan entry. The teams are allowed a certain amount of leeway in selecting the time for the games and it is stipulated simply that they must be completed between Tuesday and Friday of each week. Practically the same rules as those governing the outdoor game will obtain, the main difference being in the size of the diamonds. The base lines in this case may vary between 27 and 35 feet, depending on the place where the diamonds are laid out.

Following is the schedule:

"For eight years the Marion factory has Mr. Matchett, "which have always given satisfaction to their owners. The Marion car is well known and well thought of wherever motor cars are in use. The 1912 Marion surpasses its predecessors. It was designed by Fred Tone, who has produced a car that is up to the minute.

"The Marion motor is of the long stroke type, having a 4½ inch bore and 5½ inch stroke, giving a piston displacement of 294 inches. The valves are larger than those usually found in this size motor. An ingenious device is a shaft running crosewise of the crank case and above the crank shaft, deriving its motion directly from a worm gear attached to the crank shaft. This shaft drives the magneto at one end and the water pump at the other, thus doing away with two of the timing gears. car is well known and well thought of

timing gears.
"The car has taken well in Brooklyn and we expect that this season will be a prosperous and satisfactory one for us."

GLOOM AT MICHIGAN.

Blake, who has run the half mile in 1:56 and the quarter in relatively as fast time, has fallen under the faculty ban. This practically shatters the hope for a mile and two mile relay, it would not be surprising, therefore, if the relay race to be held with Pennsylvania in Pittsburg March 9 will be cancelled. But the most distressing thing to Fainer Kraenzlein, even more than the losses, is the fact that the new men are not turning out. There is less enthusiasm shown this year than at any time since Michigan entered the intercollegiate meet. The rest of the oldmen are eligible, but it can hardly be

THE MARION IN BROOKLYN.

Local Dealer Tells About its New Features.

American and Marion cars at the Brooklyn show are exhibited in the space of the Marion Motor Car Company, of which firm the members are John T. Matchett and Edward McFarlan.

"For eight years the Marion factory has

expected that seven men can win dual meets for Michigan.

The race question has again become a leading tople of discussion here. Lapsley, the negro sprinter, who last year was second only to Raiph Craig, is now the fastest man in college unless Jimmie Craig or Seward can head him off, which is not at all likely. There are a great many at Michigan who would wish to see the best team in college turned out regardless of color, while there is yet a minority who are against allowing negroes to compete on the teams.

Notes of the College Athletes. Varsity lacrosse practice has begun at

Varsity lacrosse practice has begun at Cornell, but for the present most of the work will be confined to a close study of the rule book in order that the coaches will not have to waste time in drilling the players in fundamentals of the game. For the purpose of stimulating interest in broad jumping at Harvard prizes will be awarded to the men making the most improvement in a series of contests in the spring.

Dr. W. N. Golden, who has been director of athletics at Pennsylvania State College for thirteen years, will resign at the end of the present year. He has been connected, professionally, with athletics for twenty-five years and has made more than one meeting of the I. C. A. A. A. A. altogether too interesting for those present.

Arrangements have been made for a dual swimming meet between Williams and Columbia, to be held in the Columbia

dual swimming meet between Williams and Columbia, to be held in the Columbia pool.

California has reduced its freshman crew squad to twenty-one men as it was found that a squad of thirty-seven was found that a squad of thirty-seven was found that a squad of thirty-seven was conveiled. Not so in the Eastern college. The more they have the better the coaches like it.

Thomas Reath, Jr., who stroked the Pennsylvania varsity eight in 1910, and who was stroke last season until two weeks before the Poughkeepsie regatts, when he was compelled to give up rowing on account of a stitch in his side, will probably not be able to row this year either for the same reason.

E. B. Dewhurst has been elected chairman of the University of Pennsylvania lawn tennis committee. It is probable that Pennsylvania will hold an interscholastic tournament during the spring.

The athletic advisory board at Phillips Andover Academy has abolished basketball and hockey will be substituted for it after this year.

Only twenty men have reported so far for the Yale freshman track team.

The loss of several of Dartmouth's football players has been blamed on the prevalent fraternity "chinning" system by Coach Cavanagh.

Three of the college basketball teams have two members of the same family in their lineup. Columbia has R. and C. D. Benson, Cornell has H. C. and S. C. Halstead and New York University has C. and J. McLaughlin.

AUTOMOBILES.

The Diamond

You know how a squeegee cleans a window. The cross and parallel bars on a Diamond Safety Tread Tire work like a squeegee.

The first bars cut through and clean away the water, mud or grease, and leave a clean, dry surface on the pavement for the following bars to grip.

Simple isn't it? But the Diamond Safety Tread Tire is the only tire based on this principle, the only really safe tire.

Remember-the Diamond Safety Tread Tire is not merely a new arrangement of buttons, knobs, or ridges.

It is a tire built by engineers who solved the skid problem by first understanding it.

The Diamond Safety Tread Tire is an all-year-round tire. It gives even Greater Mileage than the regular Diamond Tire-and the regular Diamond Tire is Greatest in Mileage among smooth tread tires.

AUTOMOBILES

This Car Costs \$1500 What More Will \$1800 Get You?

OU must judge values by comparing values. A dollar article from one man is worth only one dollar from another-not a dollar and a half. Smith, who pays a higher rent, operates extravagantly, and does little business, must take care of his "overheads" by inflating values. Therefore, he tacks an extra ten to twenty per cent. on everything he sells. But Jones, who sells the same goods, but seils more of them, and does not have the additional rents and numerous other overhead charges to take care of, sells you his standard goods minus this ten to twenty per cent. inflation. Jones is the man to deal with.

Apply this to automobiles.

The car shown here is our famous forty-five horsepower touring car. It is priced at \$1500. This car has everything of any practical value that any \$1800 or \$2000 car in America has.

Do you question this?

BROOKLYN BRANCH:

Then run over these facts:-

First of all, this car has a powerful forty-five horsepower motor. It seats five large passengers. The operating levers are in the center-where they should be. The selective transmission is fitted with the finest F & S annular bearings—the best made. It has a full floating rear axle. Both front and rear axles are fitted with the famous Timken bearings. The pressed steel frame has a double drop. The magneto is a Bosch. The tires are big. The body is finished in deep rich Brewster green trimmed with heavy nickel plate. The lamps are dead black trimmed with nickel. Self-starter only \$20 extra.

It is a magnificent, strong, powerful car. It has all the beauty and comfort that is possible to get in a popular priced car. You cannot find a weakness or a flaw. It is sound and thorough. Neither the chassis nor body could be improved upon. It is made of the best material on the market by the most modern

Can you pick any \$1800 or \$2000 car that gives you more than this? To be sure, you might get a few inches longer wheel base or a little larger wheels, but what does that amount to? And at that, you will find the car with a little larger wheel base has a much smaller motor. For all of which you are asked to pay anywhere from \$300 to \$500 extra.

We repeat, there is not an \$1800 car made that offers you any more than this one for \$1500.

Why? It is made by the largest factory in the world. These enormous plants, by reason of their huge operations, can buy material, handle material, make parts, and sell cars at smaller costs than anybody else in the business. We make 25,000 cars a year. The average standard plant turns out about 5000. That's the

difference. Right now we are shipping eighty cars a day. In round figures this is a business of about \$72,000.00 a day. In a short time we will be shipping 150 cars a day. This is a business of \$135,000.00 a day. Would these thousands and thousands of shrewd people select the Overland in preference to all others if we did not give them more car and a better car for less money?

There are over 2000 Overland dealers.

Let our dealer in this city (name and address below) take you out in this car and give you a thorough demonstration. Let him show you the unusual value. See this car, then see some of the higher priced cars. This will prove to your own satisfaction that our \$1500 car will give you all the power, speed, comfort,

service and wear that you can get in any \$1800 car made.
